

## The Mathematical Foundations of Quantum Mechanics – 25.-28.05.2025

|       | Su 25.05.                | Mo 26.05.25  | Tu 27.05.25  | Wed 28.05.25   |
|-------|--------------------------|--|--|--|
| 8:00  |                          |  | Breakfast  |  |
|       |                          |  | Quantum measurements   | History, Quantum Thermodynamics                        |
| 9:00  |                          | D. Bruss<br>Quantum measurements: von Neumann and beyond                           | M. Janssen<br>Constructing Quantum Mechanics: the Arch                       |  |
| 9:45  |                          | M. Brune<br>The Quantum Classical Transition                                       | V. Scarani<br>Quantum Thermodynamics   |  |
| 10:30 |                          | Coffee Break   |  |  |
|       |                          | Opening  | Quantum Mathematical Structures II   | Quantum Thermodynamics                                 |
| 11:00 |                          | Kick-off Lecture: R. Werner<br>Projection Operators, Hidden Variables and all that | P. Lahti<br>Quantum Logic  | R. Renner<br>Moving the cut: von Neumann's measurement |
| 11:45 |                          |  | N. Datta<br>Quantum entropies  | A. Widera<br>Quantum Thermodynamics with Cold Atoms    |
| 12:30 |                          | Lunch  |  |  |
|       |                          | Quantum Mathematical Structures I  | Computer Architectures   | Departure  |
| 14:00 |                          | R. Longo<br>Von Neumann Algebras over the Years                                    | D. DiVincenzo<br>Computer Architectures, von Neumann and Quantum             |  |
| 14:45 |                          | L. van Lujik<br>Von Neumann Algebraic Quantum Information                          | K. Nowrouzi<br>Optimal Quantum Computing Architecture through Deep Co-Design |  |
| 15:30 |                          | Coffee Break   |  |  |
|       |                          | Von Neumann beyond Quantum   | Poster Session   |  |
| 16:00 | Arrivals<br>Registration | Helmut Bölcsei<br>Cellular automata, many-valued logic, and deep neural networks   |  |  |
| 16:45 |                          | T. Kjeldsen<br>From mathematization of games to mathematical programming           |  |  |
| 18:30 |                          | Dinner   |  |  |
| 19:30 |                          | Evening Lecture: Game Theory and Economy   | Heraeus Dinner   |  |
|       |                          | B. von Stengel<br>Linear Programming and the Minimax Theorem                       |  |  |
